

Rapid Detection. Decisive Mitigation.

Iron Bow's team of dedicated cybersecurity experts work to combat cyber threats around the clock, every day of the year. Our proactive Security Operations approach helps you maintain disciplined daily cyber hygiene, conduct threat hunts, and thoroughly inspect your cyber posture, so you can stay focused on your business.

We Help You Stay Ahead of Sophisticated Attacks

Attackers are opportunistic and unpredictable. Proactive detection and early action can minimize damage and prevent large-scale disruption and reputational harm. Our team of cyber security professionals think like your adversaries to stop sophisticated attacks earlier and more effectively.

Our cybersecurity as a service model helps organizations guard their critical assets, data and reputation:

Our Cybersecurity Solutions

OPERATIONS

Managed Services

- Handler on Duty (HoD) 24/7
- Attack Prioritization
- Notifications
- Daily Cyber Hygiene Routines
- Threat Monitoring & Detection
- Threat Hunting
- IOC Patrols
- Threat Intelligence
- Cyber Weapons Inspections

ASSESSMENTS

Engagement Services

- Vulnerability Management
- Vulnerability Scanning
- Penetration Assessments
- Maturation Assessments
- Ransomware Simulations
- Phishing Simulations
- Social Engineering

RESPONSE

Engagement Services

- Cyber Incident Response
- Opportunities for Improvement
- After Action Reporting
- Response Readiness Training (TTX)

Managed Security Services Packages

MDR

Managed Detection & Response

Managed Detection and Response (MDR) Security Services offers proactive threat detection, continuous monitoring and rapid incident response capability.

Scope: Endpoint & SIEM

- ✓ 24/7/365 Threat Monitoring
- ✓ Handler On Duty Support (HOD)
- ✓ Threat Detection
- ✓ Threat Hunting
- ✓ Threat Response
- ✓ Threat Intelligence
- ✓ Threat Containment

XDR

Extended Detection & Response

Extended Detection and Response (XDR) Security Services offers holistic threat detection, investigation, and response by integrating security data across multiple layers. A centralized view of threats improves overall response time and accuracy.

Scope: Endpoint, SIEM, Network & Cloud

- ✓ 24/7/365 Threat Monitoring
- ✓ Handler On Duty Support (HOD)
- ✓ Threat Detection
- ✓ Threat Hunting
- ✓ Threat Response
- ✓ Threat Intelligence
- ✓ Threat Containment
- ✓ Incident Response
- ✓ DNS Security - DNS Policing

vSOC

Virtual Security Operations Center

Virtual Security Operations Center (vSOC) Services provides 24/7 cybersecurity monitoring, threat detection and incident response through a remote, cloud-based security operations center. vSOC solutions offer the benefits of a traditional SOC without the need for in-house infrastructure or personnel.

Scope: Customizable

- ✓ 24/7/365 Threat Monitoring
- ✓ Handler On Duty Support (HOD)
- ✓ Threat Detection
- ✓ Threat Hunting
- ✓ Threat Response
- ✓ Threat Intelligence
- ✓ Threat Containment
- ✓ Incident Response Retainer
- ✓ Vulnerability Management
- ✓ Penetration Testing
- ✓ Tabletop Exercises (TTX)
- ✓ Regulatory Compliance Support

All services are customizable and available a la carte.

Industries We Serve

- Finance
- Legal
- Banking
- Retail
- Real Estate
- Health Care
- Insurance
- Sports
- Automotive
- Sciences
- Education
- Entertainment
- Manufacturing
- Payment Card

Fortify Your Data and Systems

Iron Bow Technologies combines strategic engineering expertise with Security Operations (SECOPS) and managed detection and response (MDR) capabilities to help you bolster your cybersecurity posture with best-in-class data security and protection.
